Shutters & Doors

by:

Insulated Roller Garage Doors with the added touch of remote control

Hurricane Shutters and Doors are delighted to introduce a new range of high performance aluminium roller garage doors. Manufactured to the highest standards, they are designed to stylishly enhance the appearance of your home and provide maximum levels of security to your property.

All doors are made to measure and provide the following benefits:

- Convenient remote control access as standard
- Smooth opening and closing at the press of a button
- Excellent thermal & sound insulation
- Automatic door locking on closure
- More width and headroom is gained when original up and over timber frame is removed
- No out-swing increases space at the front of the garage for your car
- Photo-electric safety device
- Low maintenance - never needs painting

.... and we haven't even mentioned our attractive competitive prices!

*Bringing style, warmth
and security to
your home*

REMOTE CONTROL OPERATION

With the benefit of our superb remote control system, gone are the days of having to reluctantly get out of your car to struggle with the garage door when the heavens are opening or the wind is trying to knock you off your feet. By using one of the two stylish compact handsets with key fob we supply with each unit, you can now open and close the garage door without having to leave the warmth and comfort of your vehicle!

Optional extras, including outputs for the connection of a separate 240 volt courtesy light as well as an internal push button or key switch, are also available.

SAFETY

A superb, standard safety feature of our roller doors is the inclusion of an integrated, infra-red photo electric safety beam which enables the door to stop automatically and return it to the open position should an unwanted obstruction be detected in the zone of the doors path. This feature, a distinct advantage over other bottom rail safety devices, works by detecting the obstruction before it touches the door, thus preventing possible damage to the unit, or injury.

MANUAL OVERRIDE

In the unfortunate event of a power failure operating the door is not a problem as it can easily be opened from inside the garage by using a manual winding handle. Should there be no other access into the garage, an optional extra external manual winding system is also available.

COLOUR RANGE

Our surface finishes are available in a wide selection of colours to beautifully complement your existing windows and front door. Choose from

Due to printing variations the colours shown are not an exact match to the finished product. Please ask if you wish to see a sample.

OPTIONAL EXTRAS

Need more light in your garage but don't want to compromise insulation? Why not consider our optional glazed vision slats which can be easily incorporated into your roller door.

- Internal switch
- Bulkhead light
- External key switch
- External manual winding handle

GUARANTEED

For added peace of mind all of our roller garage doors are supplied with a reassuring 2 year warranty. Electric motors are guaranteed for 5 years.
